SOFTWARE DEVELOPMENT & DIGITAL SYSTEMS

From the unseen to the extraordinary.

Turning complex concepts into structured, reliable software, web and mobile applications, APIs, and integrated platforms.

AETHRA LOGO FIDELITY PROOF // A/B SOURCE SCREENSHOT VS. RECONSTRUCTED VECTOR MASTER

PHASE 01 — VERIFICATION

A // SUPPLIED RASTER REFERENCE (265 × 136 PX SCREENSHOT)

B // RECONSTRUCTED EDITABLE SVG VECTOR MASTER (INFINITE RESOLUTION)

C // PIXEL-SCALE LEGIBILITY PROOF (128 PX DOWN TO 16 PX FAVICON)

OFFICIAL MASTER GEOMETRY (8.7% STROKE):

OPTICAL MICRO-ICON VARIANT (+32% STROKE FOR <=24PX FAVICONS):

24 × 24 px Micro-Icon (Dark & Light)

Preserves rising diagonal & lower-right foot without subpixel drop-out.

16 × 16 px Micro-Icon (Browser Tab Favicon)

At 16px, official master stroke is 1.15px; optical micro-icon boosts stroke to 1.52px.

D // VECTOR RECONSTRUCTION AUDIT & OPTICAL CORRECTIONS

01 // OUTER TRIANGULAR SYMMETRY & SLOPE

Sampled apex at (137.0, 19.3) and base tips at (100.0, 86.0) & (174.2, 86.0). Normalized to an exact 9:5 (1.80) rise-to-run slope (60.95° base angle).

02 // RISING DIAGONAL INNER CROSS-STROKE

Originates from the lower-left tip and ascends at 21.03° to join the inner right leg at 62% height, carving the signature asymmetrical upper counter.

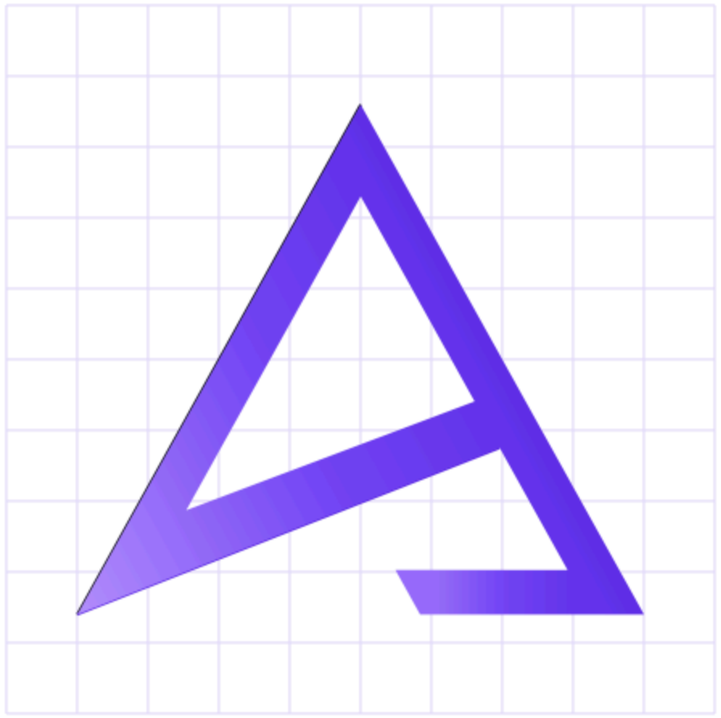
03 // OPEN LOWER GEOMETRY & RIGHT-SIDE TERMINAL

Lower-right leg turns horizontally inward from x=900 to x=584, terminating in a crisp angled notch (549.2, 797.4) strictly parallel to the 9:5 right leg.

04 // UNIFORM STROKE WEIGHT & WORDMARK

All four structural segments unified to an exact 62.6u (8.7%) perpendicular stroke width. Wordmark AETHRA uses custom open-chevron 'A' glyphs.

01 // CANONICAL VECTOR CONSTRUCTION (1000 × 1000 MASTER GRID)



02 // CLEAR-SPACE RULE (0.25H ISOLATION ZONE) & MINIMUM SIZES

MINIMUM SIZE THRESHOLDS:

- Stacked Lockup: 80 px height (digital)
- Horizontal Lockup: 120 px width
- Standalone Master Mark: 28 × 28 px
- Optical Micro-Icon: 16 × 16 px — 24 × 24 px
- Print Symbol Minimum: 6 × 6 mm
- Aspect Ratio: 10:9 (Mark) / Locked

03 // CANONICAL COLOR & MONOCHROME VARIANTS

04 // INCORRECT LOGO USAGE (STRICT PROHIBITIONS)

DO NOT REPLACE CROSSBAR

Never use a flat conventional crossbar.

DO NOT ROUND OR BUBBLE

Preserve straight edges and sharp corners.

DO NOT CLOSE LOWER BASE

Keep the asymmetrical open lower geometry.

DO NOT SWITCH TO NEON/CYAN

Keep the approved violet & ink palette.

DO NOT ALTER WORDMARK

Aethra

Never substitute a generic serif/sans font.

DO NOT ADD EXTRA SYMBOLS

Never place stars or icons beside the A.

LIGHT-FIRST PRIMARY APPLICATION (75%+ SURFACE AREA)

AETHRA

Engineered clarity on airy light surfaces.

Primary body text uses Deep Ink (#171327) with 17.4:1 AAA contrast, paired with Muted Ink (#615B73) at 5.82:1 AA.

Primary Action ->

INTENTIONAL DARK-CONTEXT COUNTERPART

AETHRA

Quiet authority in dark environments.

Used selectively for developer consoles, code blocks, and dark-mode interfaces without losing the violet brand DNA.

02 // SUPPORTING GRAPHIC LANGUAGE & COMPONENT TOKENS

Derived Diagonal Planes & Airy Grids

- Diagonal lavender planes echo the exact 60.95° leg slope and 21.03° rising cross-stroke of the approved A monogram.
- Generous white/lavender breathing room (>65% open surface).
- Hairline 1px borders (#E2D9FA) and subtle 8px–12px card radii.
- Zero decorative sci-fi clutter, stars, or heavy neon glows.

AETHRA

[website-placeholder] • [email-placeholder]

DATE: [YYYY-MM-DD] // SUBJECT: EXECUTIVE SUMMARY & ARCHITECTURE SCOPE

1. Overview & Objectives

AETHRA partners with organizations to translate complex operational requirements into structured, maintainable digital products. This document outlines the recommended system architecture, API contracts, and iterative delivery milestones for your platform.

2. Proposed System Architecture

01 // Client Layer
Responsive Web Application & Native Mobile Clients

02 // API Gateway
Versioned REST / GraphQL Contracts & Access Control

03 // Core Data Layer
Relational Database Schema & Automated Pipelines
